## WRITEUP OF ACADEMIC EFFORTS

## ACADEMIC ACHIEVEMENT & GROWTH REPORT

---

### Executive Overview

The mission of the Anand International School is to focus on learning for every student every day. The vision at PSMS emphasizes the fact that learning is reflected in both achievement and growth. Now in the Thirty Third year of publication, the format and structure of this report have been refined each year to provide descriptive statistics and analyses across a series of standardized assessments. For the 2019 report, we refined our process of engagement to include interactive, state-provided data analysis accounts to our Academic Leadership Council (ALC) members. The data accessible in these systems allows for disaggregation and a several year snapshot of student performance, with multiple permutations. Folders of static data and spreadsheets were also created, which were utilized by ALCs and principals in leading data analysis sessions with our departmental and grade-level teams of teachers. The collective group of administrators and professional staff identified and prioritized strengths, opportunities, and action steps to be reflected in the recommendations section. Emphasis was placed on integrated action steps, in a prioritized manner targeting high-leverage actions. Connecting these action steps to work and recommendations emerging from the indepth program reviews and to the teaching and learning occurring in our classrooms daily is of utmost importance to ensure sustainability and alignment.
